

Operations/Chief
Pilot's Working
Group

Operations/Chief Pilot's Working Group

- AC 90-80C Update-Shawn Silverman
 - GOM Weather Box Expansion
 - FAA has provided Template for gather data for implementing expanded WX Boxes
 - Operators Have agreed to begin using the expanded WX Boxes
 - Will provide FAA with Data sheets by end of the year
- Offshore NOTAMs
 - Currently not an effective way to check Offshore En-Route NTOAMS such UAS NOTAMS
 - Created a Sub-Working group to identify effective procedures between operators and energy companies

Operations/Chief Pilot's Working Group

- Training Vendors

- Discussed increased difficulty scheduling Flight Safety Simulator Blocks
- Working to find a solution and work with Flight Safety to reduce burden of trying to schedule training

- Tropical Weather- WRA impacts

- Currently no policy in place for NOAA Hurricane Aircraft or Air Force Aircraft to work with us
- Clear they have limited understanding of GOM operations and evacuation procedures in the GOM
- Need to push for a working group to provide increased clarification for improved coordination policies
