How did we get here? A brief overview of all the "FDM Industry Working Groups Past, Present, or Future":

IHST

Global HFDM Steering Group

Helishare

Pegasus/Asias/HAI/FAA

Helioffshore

EASA

Vision for the HSAC FDM Working Group: HSAC members share FDM Best Practices for all membership. Extension of HeliOffshore FDM Working Group producing the FSIG - Ensure HSAC members (especially those who are HSAC members but not Heli Offshore members) have a collective voice to provide feedback to the HeliOffshore FDM Working group. Making sure each is aware of what one is doing to other. Identifying any possible conflicts and finding acceptable solutions, or highlighting them separately in HSAC FDM checklist, guidance, or alternate procedure document.

Action List :

Timeline for FDM FSIG Completion

OEMs US/HSAC reps to reach out to HeliOffshore counterparts (some overseas) and establish communication link to collaborate going forward

Get with Amber for Questionnaire (leg work has already been done through HeliOffshore work group) to send to HSAC Members, gather current list of participants for FDM and also solicit membership what expectations are for this group

Reach out to HEMS membership (current- PHI Air Medical, Acadian Air/Ambulance ; potential- Air Methods, Metro, AMGH, others) and gauge interest in potential collaboration benefits in alignment with incorporation of the HEMS FAA rule
