

**HSAC UNMANNED AERIAL SYSTEMS
And
AERIAL OBSERVATION
WORKING GROUP
Oct. 2016**

HSAC UAS CHARTER GOALS:

- Continuous improvement of HSAC/IOGP UAS Recommended Practices (RPs) through identification of leading practices and technology across UAS industry which increase safety and reduce incidents
- Increase industry awareness of and support for HSAC/IOGP standards
- Increase participation from the international oil and gas aviation community to continue the improvement and relevance of HSAC/IOGP RPs.
- Influence the reduction of organizational, regulatory, civil litigation, criminal sanction, and public disclosure impediments to voluntary, non-punitive collecting and sharing of safety information
- Promote the initiation of additional internal safety data collection and analysis programs, with the help of HSAC partners
- Support expansion of existing sharing among UAS users and operators
- Promote development and use of analytical methods and tools
- Plan HSAC events and products to continue development and assess progress.
